

Environmental Policy

S&D trusts that we have a responsibility to care for and preserve the environment for present and future as our prime concern. We are fully committed to enhancing environmental performance by creating, maintaining and ensuring a safe and a clean environment through all our business activities. Recognizing resource utilization, emissions to the environment and environmental awareness as the areas where our key impacts are from, we will encourage our business partners and members of the wider community to join us in this endeavor not only for commercial sense but also because it is our responsibility towards the future generations.

We will strive to:

- ❖ Adopt the highest environmental standards in all areas of operation & meeting.
- ❖ Conserve the supplies and optimize the consumption of natural resources.
- ❖ Encourage the use of sustainable energy sources wherever applicable and minimize waste.
- ❖ Ensure proper disposal of all waste streams, giving special attention to hazardous waste.
- ❖ Continual assessment of the current processes, new processes, organizational activities & products intended to be introduced in advance.
- ❖ Offer services that contribute a least damage to the environment and encourage others to do the same.
- ❖ Promote environmental awareness and competence among employees and other stakeholders.
- ❖ Promote environmental stewardship at all levels of the organization.

At all times, principles of the Environmental Policy will be integrated into our business decisions. S&D will periodically review the implementation of the environmental policy by monitoring progress and reviewing environmental performance against targets and objectives on a regular basis and make improvements as and when required.
