

Quality Policy

We, at S & D declare our commitment and responsibility to implement Quality Management System (QMS) established in accordance with the requirements of ISO 9001: 2015 throughout the organization.

We are committed to and are collectively responsible for improvement in process and quality of our products constantly through continual improvement of effective QMS, training, technology and self-development to meet or exceed the needs and expectations of our customers and other interested parties including the applicable legal requirements.

The management is committed to determine and provide qualified personnel and other resources needed to effective implementation of QMS and for the operation and control of its processes.

We have adapted risk-based thinking within the company by identifying, assessing and mitigating the risk.

We have established quality objectives at relevant functions, levels and processes needed for the QMS.

We ensure that this policy is implemented, communicated, be understood and maintained at all levels of employees, customers and external providers of S & D.
